Enrich your curriculum with multicore microcontroller. Expose your students to the newest technologies being used in “Internet of Things” (IOT). The activities are easy to teach, fun to learn and engage students.

Two Parallax Courses combined into a 3-day intensive hands-on training session:
- Propeller Educator Course
- ActivityBot Robot Course  [www.learn.parallax.com](http://www.learn.parallax.com)

Explore electronics and programming with “What’s a Multicore Microcontroller?” and “Robotics with the ActivityBot” – perfect entry-level kits for technology and pre-engineering programs.

Learn how easy it can be for students to automate their own STEM projects with the multi-core Propeller microcontroller using multiple programming environments: C, Assembler, Spin and Basic.

Who should attend: Middle, High School and Post-Secondary Educators of:

**Applied Logic**  **Pre-Engineering**
**Computer Programming**  **Robotics**
**Digital Electronics**  **STEM**
**Embedded Systems**

Training includes:
- Continental Breakfast all three days
- ActivityBot
- Propeller Board Education Kit
- Multiple Lab Breakout Sessions

Instructors
Mike Harrison IST Professor, Great Bay CC
PLUS: Parallax Engineering & Education Professionals
